X
Compact Multiple
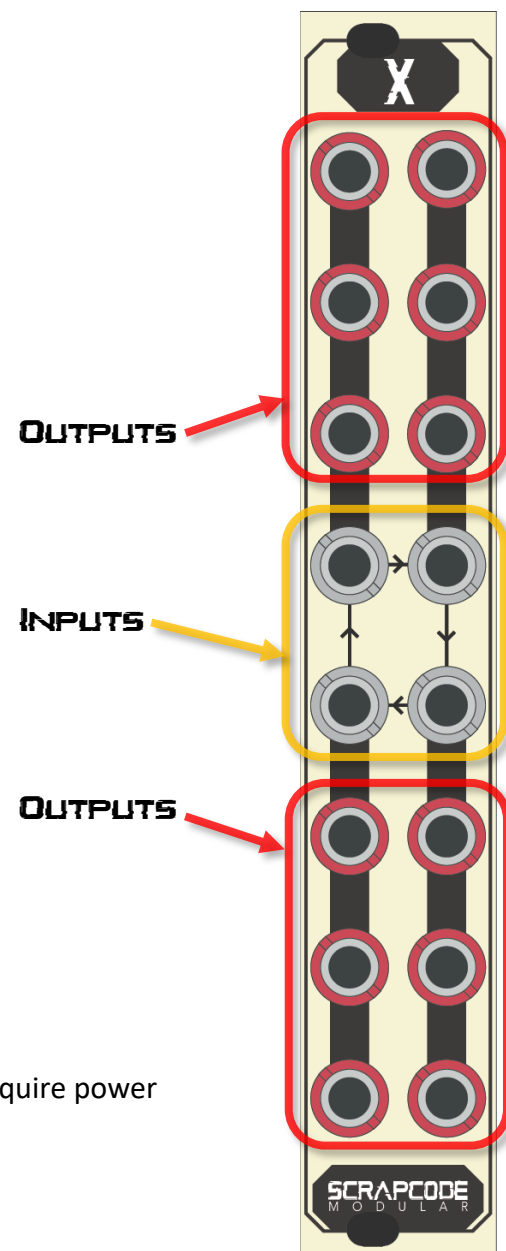

This module is a **passive multiple** which allows for a signal to be split between up to twelve **OUTPUTS**.

The **INPUTS** are **normalled**, meaning that when a patch cable is plugged in it will break the connections between its own set of **OUTPUTS** and the rest of the module.

Various mult configurations can be achieved:
- A single 1x12
- Two 1x6
- Four 1x3
- One 1x6 and two 1x3
